Child care will be provided

Southwest Early College Campus  
6512 Wornall  
Kansas City, MO

**TO PARTICIPATE, RSVP TO:**  
Alice Reckley, 816-255-8191

### WILL OUR STUDENTS BE READY FOR 21<sup>ST</sup> CENTURY CAREERS?

#### DID YOU KNOW?

Many of the highest-paying and most rewarding new jobs require advanced skills in math and science. Local employers say that they consistently have to hire outside our region because not enough young adults are prepared upon graduation to succeed in these fields.

#### JOIN US TO DISCUSS:

1. Southwest ECC's vision for better preparing students for careers in Math, Science, Engineering & Technology (METS)
2. And what role parents, civic leaders, community organizations, businesses, and others can play in supporting the vision of schools like Southwest ECC in better preparing all students for these vital careers.

*Southwest Early College Campus is an innovative new math/ science focused, 6–12 school open to all students living in the Kansas City, Missouri School District (no entrance exam required). Students have the opportunity to earn significant college credit prior to graduating high school. The goal of this exciting new school is to prepare Kansas City youth to successfully complete a four-year college degree and pursue rewarding careers in METS (Math, Engineering, Technology, & Science), using a project-based curriculum with extended day and extended year opportunities. **For more information on Fall 2009 enrollment, contact (816) 418-1800.***

Southwest Early College Campus is a partnership of:
